

I find it amazing how services as useful as this can be threatened by competitions who are not doing as well. These other competitors need to find ways themselves to improve their services and stop trying to shut down others, like XM Radio (which I PAY for!!!) in order to get their way. I urge to, as a loyal XM listener, to NOT shut down the traffic/weather broadcasts. I listen to these regularly and they truly help me plan my route to school and work everyday. Living in Los Angeles County means having to struggle with a difficult commute twice a day, everyday. Services like this one are fantastic tools that help make the trip home easier and safer. First Amendment rights are being violated, so again I ask that you allow XM to continue their great work.
